PROFESSIONAL SUMMARY

Cybersecurity graduate with internship exposure to security reporting, endpoint protection deployment workflows, lab network segmentation, and infrastructure support. Experienced in Excel-based reporting for Action1 and KnowBe4, basic VLAN topology validation, and security-focused projects involving threat detection, forensic logging, and Raspberry Pi deployment. Holds certifications in ethical hacking, network security, Fortinet, and cloud security; seeking entry-level roles in security operations, vulnerability management, incident response, IT audit, or cybersecurity-focused infrastructure support.

TECHNICAL SKILLS

Security Tools: CrowdStrike Falcon, FortiGate, Action1, KnowBe4, Wireshark, Nmap, Nessus, Burp Suite, Metasploit
Networking & Infrastructure: VLAN segmentation, LAN/WAN and DNS fundamentals, basic topology planning, connectivity testing, firewall support
Platforms & Technical: Windows, Linux, Git, Python, Raspberry Pi, Excel
Security Areas: Endpoint security, vulnerability assessment, incident response fundamentals, security documentation, awareness reporting

EXPERIENCE

IT Infrastructure Intern | Adventus IT Services Philippines, Inc. - Makati, Metro Manila Dec 2025 - Mar 2026

- Prepared and maintained Excel-based reports for Action1 and KnowBe4 to support internal monitoring, tracking, and documentation activities.
- Assisted in basic lab topology planning and connectivity validation using two computers, including segmentation concepts for VLANs
- Gained exposure to CrowdStrike Falcon during endpoint security implementation and deployment activities through console familiarization and workflow observation in a read-only environment.
- Supported basic FortiGate-related setup concepts involving LAN, WAN, DNS, and VLAN segmentation in a controlled training environment.
- Attended product briefings, technical sessions, and vendor events to stay current on cybersecurity and IT infrastructure solutions.

Officer | Cyber Security Intelligence Alliance (CSIA) - Angeles City, Pampanga Jun 2024 - Mar 2025

- Coordinated cybersecurity workshops, seminars, and awareness activities for students and the broader academic community.
- Designed Capture the Flag challenges and supported peer learning in ethical hacking, incident response concepts, and security tools.

SELECTED PROJECTS

Capstone Project - Detection and Mitigation of Dormant Cyber Threats in Intelligent Virtual Assistants: Developed an on-device monitoring framework on Raspberry Pi 4 using TensorFlow Lite, MFCC preprocessing, VAD, and forensic logging to detect suspicious voice-trigger activity.
WiFi Sentinel: Built a Python-based CLI toolkit for controlled wireless security testing, packet sniffing, and WPA2 capture workflow practice.

EDUCATION

Holy Angel University - Bachelor of Science in Cyber Security Graduate April 2026
Dean's Lister (S.Y. 2022-2025)

CERTIFICATIONS

Cisco Ethical Hacker; Cisco Certificate in Ethical Hacking; CCNA: Enterprise Networking, Security, and Automation; Fortinet Certified Associate Cybersecurity; Fortinet FortiGate 7.6 Operator; AWS Academy Cloud Security Builder; Fortinet Certified Fundamentals Cybersecurity; ISC2 Candidate
